Dear Mr. King:

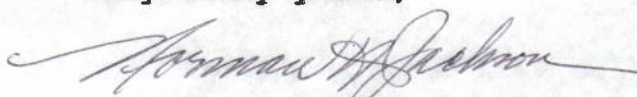

Re: Boulder Irrigation Company

I have received your letter of July 26, 1972, addressed to officials of Boulder Irrigation in behalf of Ivan Lyman. At the present time, we are in the process of arranging a field inspection of the Boulder Irrigation and Water Development Company System in connection with the State Engineer's Office, company officers and interested shareholders. It is anticipated that after the field inspection, that all interested parties and their legal counsel, if desired, will confer concerning solutions to the problems which the company and shareholders are experiencing.

P
I am sending a copy of this letter to Mr. Gerald W. Stoker at the State Engineer's Office in Cedar City, requesting that he keep you and Mr. Lyman advised of arrangements for the field inspection and conference. Mr. Lambert, the State Engineer, has been having difficulty finding a suitable date; and I will be absent from the State for the next two weeks. I have advised Mr. Stoker to go forward with the field examination in my absence, if convenient; and at the present time it appears that the conference will be set sometime around the first of September.

Y
I do want to take vigorous exception to the first full paragraph of the second page of your letter, which contains an implied threat of criminal prosecution in connection with this situation, which threat is highly improper. This is a decision to be made by the County Attorney and would not involve company officials to whom you have addressed your letter while acting in their representative capacities.

Very truly yours,

Norman H. Jackson

NHJ/pj
